

REAL. TEXAS. SERVICE. CHAMPION

Johnny Snell, Signal Technician

Johnny has been a signal technician for the Public Works Department since 1988.

Johnny's responsibilities include maintaining more than 110 traffic signals, 77 intersections with video detection cameras, 28 closed-circuit TV cameras and 81 school flashers.

In the past year, he has teamed with co-workers to install 110 fiber switches to allow communications to the traffic signals to make traffic management more efficient and reliable. He has also installed 81 cell modems in school flashers to program and monitor them remotely from the city's Traffic Management Center.

Johnny's "traffic light" approach to his job is always green as he is eager to move forward to embrace the city's CARE values by the ethical manner in which he maintains equipment and helps keep the community safe.
