

Fire Extinguisher Felt Project

Supply List:

- Black felt
- Red foamie square
- White felt
- Black plastic lacing

You Supply:

- Glue
- Scissors
- Markers *optional*

Instructions:

1. With the red foamie square, cut out the cylinder shape of the fire extinguisher.
2. With the white felt cut out the base and handle.
3. Glue onto the red cylinder.
4. Take the black plastic lacing and glue to the left end of the handle. This is the "hose".
5. With the black felt, cut out a nozzle.
6. Glue to the end of the hose.
7. With the white felt, cut out a half circle for the top of the nozzle.
8. Glue onto the top of the hose where the hose connects to the nozzle.
9. With the black felt, cut out a trapezoid shape for the right side of the handle.
10. Glue onto the handle.
11. *optional* color flames onto the front of the cylinder.
