

BlueCross BlueShield of Texas

2022 HDHP-HSA Preventive Drug Program List

**Sales Guide for Qualified Health Plan (QHP/"Metallic"), Mid-Market and
Blue Balance Funded Groups**

Effective January 1, 2022

INTRODUCTION

Blue Cross and Blue Shield of Texas (BCBSTX) administers a preventive drug benefit for select eligible high deductible health plans (“HDHPs”), which may be used with a Health Savings Account (“HSA”). The preventive drug benefit program includes categories of prescription drugs that are often used for preventive purposes. If a doctor has prescribed any of them for preventive purposes, then HDHP-eligible members and their dependents may have coverage before meeting the plan deductible.

The HDHP-HSA Preventive Drug Program is designed to better manage members' health conditions by including certain categories of preventive medications at reduced out-of-pocket member costs.* Please be reminded that HSAs have tax and legal ramifications.

This Guide lists the Standard coverage categories. Note: Some plans may not apply all Standard coverage categories.

This document is provided only as a resource to assist your group in managing its preventive drug benefit. This guide is updated on an annual basis, however, products on the list may be added to or removed from coverage throughout the year. Members should always check their drug's current coverage status.

Please Note: PDF publication lists for members are created annually.

Drugs in each category are listed alphabetically on the following pages.

Generic drugs are listed in **bold**.

Brand drugs are listed in all CAPITAL letters.

Some strengths and/or formulations may not be covered.

Brand names in parenthesis are listed for reference and are not covered under the benefit.

This drug/drug category may also be included under the Affordable Care Act (ACA) coverage of preventive services for eligible benefit plans (HDHP or non-HDHP HMO or PPO). These products have limited or \$0 member cost-sharing (copay or coinsurance), when meeting the conditions as outlined under the regulation and when a member uses a pharmacy or doctor in the health plan's network. Not all products covered under the ACA are shown. The member must have a prescription for claims processing. ACA labeled drugs are identified by the blue icon above.

*Member costs (copay or coinsurance) may vary, based on plan benefits and/or group selection. Some members may pay as little as \$0 before meeting the deductible.

The preventive drug program currently includes prescription drugs in the following categories:

Standard Categories

- Anticoagulants / Antiplatelets
- Depression (Selective Serotonin Reuptake Inhibitors, SSRIs)
- Diabetes Medications (Hypoglycemic Agents*, Insulin Only* and Oral Only)
- Diabetic Supplies
- High Blood Pressure (antihypertensives)
- High Cholesterol (lipid-lowering)
- Osteoporosis

*This category/some products within this category may not apply to select plans

For more information on the Preventive Drug Benefit Program, including which categories may be available, please contact your BCBSTX account representative.
